

Types of Arguments

1. Deductive Reasoning

Gandhi opposed all violence.

Any future war US-directed war in Syria would involve violence.

∴ Gandhi, if he were alive, would certainly oppose a US-directed war in Syria.

2. Inductive Reasoning

Most Jews, African-Americans, and Asians voted for Democrats in recent elections.

There is nothing special about the upcoming Congressional races in 2022 to think that these ethnic groups will vote any different from what they did in the past.

∴ It is likely that a majority of Jews, African-Americans, and Asians will vote Democratic in the next set of Congressional races.
